IT Vederci bene e in qualunque situazione.

Da questo semplice concetto nasce il progetto **STREET VISION** di **Top Light**. Poder guidare in sicurezza sotto una pioggia battente, come viaggiare sotto una nevicata o in mezzo alla nebbia o semplicemente in condizioni di scarsa visibilità senza dover affaticare la vista, sono solo alcuni degli obiettivi che ci poniamo quando pensiamo allo sviluppo dei nostri prodotti. **Facciamo di tutto affinché l'automobilista possa vederci bene, in marcia come in manovra e lo facciamo con ogni mezzo.**

EN See clearly, in any situation.

STREET VISION, a **Top Light** project, was created from this simple concept. To be able to drive safely in the pouring rain, or travel under a snowfall or in the fog or simply in conditions of poor visibility without straining your eyes. These are just some of the objectives we set for ourselves when we think about the development of our products.

We do everything we can to ensure that motorists can see clearly, either while driving or manoeuvring, and we do it with all vehicles.

FR Voir clairement et en toute situation.

C'est à partir de ce simple concept qu'est né le projet **STREET VISION** de **Top Light**. Pouvoir conduire en toute sécurité sous une pluie battante, voyager sous la neige ou en plein brouillard, ou simplement dans des conditions de mauvaise visibilité sans se fatiguer la vue, sont seulement quelques-uns des objectifs que nous nous fixons lorsque nous pensons au développement de nos produits.

Nous faisons le maximum afin que l'automobiliste puisse voir clairement, en route ou lors d'une manœuvre et nous le faisons pour tout véhicule.

ES Ver bien y en cualquier situación.

De este simple concepto nace el proyecto **STREET VISION** de **Top Light**. Poder conducir con seguridad bajo una lluvia intensa, como viajar bajo una nevada o en medio de la niebla o simplemente en condiciones de escasa visibilidad sin cansarse la vista, son solamente algunos de los objetivos que nos proponemos cuando pensamos en el desarrollo de nuestros productos.

Hacemos de todo para que el automobilista pueda ver bien, tanto en la marcha como en una maniobra y lo hacemos con todos los medios.

DE Gute Sicht in allen Situationen.

Aus diesem einfachen Grundsatz entsteht das Projekt **STREET VISION** von **Top Light**. Sichere Fahrt ebenso bei strömendem Regen wie bei Schneefall, im Nebel oder einfach unter schlechten Sichtverhältnissen ohne die Augen anzustrengen, sind einige der Ziele, die wir uns gesetzt haben, als wir an die Entwicklung unserer Produkte dachten.

Wir tun alles, damit Autofahrer eine gute Sicht haben sowohl bei der Fahrt als auch beim Manövrieren und wir tun es mit allen Mitteln.

RU Видеть ясно в любой ситуации.

Из этой простой концепции родился проект **STREET VISION** от **Top Light**. Ездить на машине под проливным дождем или в снегопад и туман или просто в условиях плохой видимости, не напрягая глаза - вот лишь некоторые из целей, которые мы ставим перед собой при разработке нашей продукции.

Мы делаем все возможное, чтобы гарантировать автомобилисту предельную видимость во время вождения или выполнения маневров и мы делаем это всеми доступными средствами.

Problème 3

Flash + voyant check control allumé sur tableau de bord

Solution

Raccorder d'abord le Canceller, puis le Canbus, puis le kit Headlight (Canceller directement raccordé au connecteur de la voiture) - cela permet d'éviter les flashes, spécialement sur les Mini-BMW avec ampoule H4

ES

Problema 3

Flash + encendido del check control del salpicadero

Solución

Primero conectar el Canceller, luego el Canbus luego el kit Headlight (Canceller conectado directamente al conector del coche) Especialmente en los Mini-BMW con lámpara H4 - se evitan los flashes

DE

Problem 3

Flash + Aufleuchten der Prüfanzeige auf dem Armaturenbrett

Solution

Zuerst den Canceller, dann den Canbus, dann den Headlight-Bausatz anschließen (Canceller direkt mit dem Verbinder des Autos angeschlossen) dies speziell bei Mini-BMW mit H4-Lampe - dadurch werden die Flashes vermieden

RU

Неполадка 3

Вспышка + включение контрольной лампочки на приборной панели

Решение

Сначала подключите подавитель, затем Can-шину, затем комплект Headlight (Подавитель, подключенный непосредственно к разъему автомобиля) так, особенно на Mini-BMW с лампой H4 - вы избегаете вспышек
